

ABSTRACT

5 A printhead assembly is provided, comprising at least one printhead module comprising at least two printhead integrated circuits, each of which has nozzles formed therein for delivering printing fluid onto the surface of print media, and a support member supporting and carrying the printing fluid for the at least two printhead integrated circuits, a casing in which the at least one printhead module is removably mounted, and a capping member capping a terminal end of the support member of the at least one printhead module.
